

PRODUCTS OVERVIEW

STRONG CONNECTION

We are one of the leading global manufacturers of injection-molded fittings and tools, supporting investments both in gas and water distribution systems.

With our vast knowledge and significant experience, gained from thousands of completed investments, we are one of the world's most important suppliers of high-quality solutions.

We are creating a strong connection, not only with our products. Through continuous investments in infrastructure, cutting-edge equipment, and our team, we are able to develop, produce and support in a practice-oriented manner, with an eye for detail and the far-sighted approach.

Meet all of our strengths.

FROM DESIGN TO IMPROVEMENT

Using leading-edge technology, business cooperators feedback and our best ideas, we create innovative and technically advanced solutions to meet the ever-evolving needs of customers.

We offer more than 1000 products, but also customized solutions, providing the answer to highly individual customer needs and industry-specific requirements.

NO.1 JOB

Quality is the key aspect in all our activities. We provide extensive process of testing new products, as well as release control of the production with our state-of-the-art laboratory.

With production only from the original PE 100-RC, alignment with all international standards and a traceability code on each fitting, we ensure a superior level of quality.

BIG DIFFERENCE

Our experience ensures not only top-quality products, but also the first-class customer care. We provide a broad range of support: from technical advice, through a strong commitment delivery and service, to construction site support and trainings.

We process tons of material, supplying few millions of fittings per year, constantly working to your advantage.

WORLDWIDE BRAND

In hard-to-reach places, difficult climate and extreme conditions - our fittings always meet the challenge.

FOX's global reach and presence ensure prompt, effective and uninterrupted delivery of products and services to our customers in every place on earth. Our own facilities, along with well-developed network of distributors, is a total of more than 100 locations worldwide. And this is not our last word on this matter.

ELECTROFUSION FITTINGS

Electrofusion fittings are manufactured using modern, automated lines for plastic processing. It guarantees the high and stable quality of the detail, trouble-free installation and durability of the connection, no matter what medium is transported in the pipeline.

BHZ FITTINGS

BHZ fittings is a line of electrofusion fittings, including ready-to-use products, dedicated to dual-zone welding. These fittings, like other electrofusion, are successfully used in gas and water installations and in other industrial applications.

SPIGOT FITTINGS

Spigot fittings are available in a wide range of types and sizes. High-quality products provide a durable, leak-free piping system both in gas and water supply networks, as well as in other industrial installations.

PE BALL VALVES

Polyethylene ball valves can be used in various industries, in all types of PE pipelines, properly to any type of liquid or gas medium. Produced in a wide range of sizes/dimensions, characterized by high resistance to corrosive and long service life.

PE/BRASS PE/STEEL TRANSITIONS

PE/brass and PE/steel transitions fittings are used in installations distributing gas and water. PE/brass transitions are available with male and female threads, in various types and sizes. PE/steel transitions are produced in two versions: injection and mechanical.

EQUIPMENT FOR DRILLING UNDER PRESSURE **FOXDLT**

FOXDLT is the most efficient solution available on the market. The use of our device significantly reduces the time of connecting to the operating network, minimizes the risk of contamination of the pipeline, saves costs connected with closing and restarting the pipeline and doesn't cause water loss.

ELECTROFUSION WELDING MACHINES *CONNECT*

The CONNECT electrofusion line includes 4 devices that support fittings with the following diameters: 20-160 mm, 20-315 mm, 20-500 mm and 20-1000 mm. CONNECT welders are easy-to-use, universal devices that connect fittings from all manufacturers available on the market.

WELDING ACCESORIES

Welding accessories such as scrapers, pipe squeezers and clamps are essential and useful during the assembly of water, sewage and gas installations. A wide selection of auxiliary products will facilitate and improve each process of electrofusion welding.
